WHY CHOOSE VR FIRE TRAINING?

Transform your fire safety training with cutting-edge virtual reality technology that delivers superior results and unmatched safety.

RISK-FREE TRAINING

Practice dangerous scenarios in a completely safe virtual environment without any physical risk to trainees.

IMPROVED RETENTION

VR training delivers up to 4x better knowledge retention compared to traditional training methods.

ECO-FRIENDLY

VR training is 100% clean and avoids regulatory barriers, allowing unlimited repetitions without harming the environment.

SCALABLE LEARNING

Train unlimited team members simultaneously without the need for expensive physical equipment or facilities.

TIME EFFICIENT

Complete comprehensive fire safety training in a fraction of the time required for traditional methods.

SCENARIOS FOR ANY WORKPLACE

Whether in an office, warehouse, factory, or healthcare facility, VR fire training can be tailored to industry-specific environments.

WHY CHOOSE VR FIRE TRAINING?

Transform your fire safety training with cutting-edge virtual reality technology that delivers superior results and unmatched safety.

WHAT CUSTOMERS SAY

"We have worked with OneBonsai to create a stable product that allows us to achieve our training goals for fire training. We can say with confidence that we have succeeded in achieving our objectives."

Christophe Van Eesbeek
Business Development Manager

"We introduced VR Training about a year ago and we've already trained over 500 people in groups of around 18"

Bart Bosmans
Colruyt Group Technics

"I think that VR is definitely recommended at the moment, because it's more playful"

Mie Stockman
Prevention Advisor (Imelda Hospital)

"By repeating the exercise regularly and in a safe manner, you can train people's behavior in the event of a fire. Since warning others and notifying the emergency services is crucial, this can effectively be practiced through such drills."

Herve Buisset
CEO (De Nestor)

"Within Barco, VR is seen as an opportunity to train our first responders more efficiently. But it can also be applied to regular employees who are not first responders."

Perrine Vandenberghe
Prevention Advisor (Barco)
